This comprehensive study guide covers the top 300 drugs, including their brand and generic names, uses, and side effects. It is an essential resource for healthcare professionals, students, and anyone who wants to learn more about medications.

## Brand and Generic Names

When a drug is first developed, it is given a brand name by the pharmaceutical company that manufactures it. However, once the patent on the drug expires, other companies can manufacture and sell the drug using the generic name.

Generic drugs are chemically identical to brand-name drugs, and they have the same uses and side effects. However, generic drugs are typically much cheaper than brand-name drugs.

Brand Name	Generic Name	Uses	Side Effects
Advil	Ibuprofen	Pain reliever, fever reducer	Stomach upset, heartburn, nausea
Aleve	Naproxen sodium	Pain reliever, fever reducer	Stomach upset, heartburn, nausea
Lipitor	Atorvastatin calcium	Cholesterol-lowering drug	Muscle pain, fatigue, nausea
Zocor	Simvastatin	Cholesterol-lowering drug	Muscle pain, fatigue, nausea
Nexium	Esomeprazole magnesium	Heartburn medication	Headache, diarrhea, nausea
Prilosec	Omeprazole	Heartburn medication	Headache, diarrhea, nausea
