Who is Dali?

Dali is a mysterious figure who claims to be a former English teacher and recovering alcoholic. Little is known about his past, but his writing style is unique and engaging. Dali's humor is often dark and self-deprecating, but it is always intelligent and thought-provoking.

What is "You Drink Like Fish" About?

"You Drink Like Fish" is a collection of essays on various aspects of English language and culture. Dali covers everything from grammar and pronunciation to slang and idioms. However, the book is not simply a dry textbook. Dali uses his own experiences with alcohol to illustrate his points, making the book both entertaining and educational.

For example, in the chapter on "Tenses," Dali explains the difference between the present perfect and the simple past by using the example of a

hangover. He writes:

> "The present perfect is used to describe an action that started in the past and continues to the present. For example, 'I have been drinking since last night.' This means that I started drinking last night and I am still drinking now. The simple past is used to describe an action that happened and finished in the past. For example, 'I drank too much last night.' This means that I started drinking last night and I finished drinking last night."

Dali's use of humor makes his explanations easy to understand and remember. Even if you are not a native English speaker, you will be able to learn a lot from this book.

What is the Japanese Edition Like?

The Japanese edition of "You Drink Like Fish" is a faithful translation of the original English text. However, Tawada has added some additional notes and explanations to help Japanese readers understand the cultural references and humor.
